Education

2021-present
California State University, Los Angeles
Los Angeles, CA
B.S. Computer Science
GPA 3.9

Key Skills

Java
Python
C
C++
MySQL
HTML
CSS
Bootstrap
Haskell
Eclipse
GitHub
IntelliJ
PyCharm
Visual Studio Code

Objective

As an aspiring Computer Science student, I want to improve the technology in the subfield of cybersecurity for the betterment of computer software. I aim to solve complex issues and problems involving cybersecurity to improve the overall computer infrastructure. My goal is to create software that revolutionizes the field of cybersecurity.

Experience

January 2022 – December 2022
Relational Databases • Data Structures • Computer Systems

January 2023 – May 2023
Programming Paradigms • Internet and Web Design • Cybersecurity

August 2023 – December 2023
Automata Theory • Software Engineering • Operating Systems

Projects: • Implemented working web file using Eclipse servlets to track and display patient and COVID vaccine information in tables. • Created drawing GUI that functions like Microsoft Paint. • Implemented BusyBox and Magic 8-Ball GUIs using JavaFX. • Implemented GUI that displays 1000 movies and their ratings as well as their respective posters. • Created Book Exchange System using Django, Python, CSS, and HTML.

Other Skills

I am bilingual, speaking both English and Mandarin Chinese. I also speak the Chiu Chow dialect. Communication, leadership, team-player, and time management.

Activities

- Member of National Society of Collegiate Scholars
- Member of National Society of Leadership and Success
- Member of ACM (Association of Computing Machinery)
